Kaspars Bariss

Sensory space - fear or security?

Sensory space, where you wake up

Security or a feeling of fear?!

When anxiety arises in you,

You feel like you're on granite!

In a sensory space, where you see miracles,

Lights, colors, even water!

Are those bombs covering the body?!

I'm amazed by all these miracles!

So the question arises:

Is your goal understandable?

To sit in a room and do nothing,

Or to the center, and do something?!
